PROJECTS

My Weather App (05/2023 - Present)

- It is a webpage designed to know the current weather of any city from the provided search engine. I've used an API to showcase different types of weather details of a particular place.
- The technical languages used in this project were: HTML, CSS, JavaScript.

Whatsapp ChatBot (04/2023 - Present)

- The technology used: Node.js.
- It is a software application used to conduct an online chat conversation via text or text-to-speech, instead of providing direct contact with a live human. It has been used in different contexts, from Student support to syllabus/books, exam/class schedules, etc. Our creativity can only limit its use!

Online Voting System

- Team Size : 2.
- Responsibility : Front-End.
- Project Details : IT is a web application which is developed to conduct election process through internet. It can speed up election results.
